

# GROUND SLEEVE AND FOUNDATION LAYOUT TO SUIT 80, 90 & 100MM NB POLES

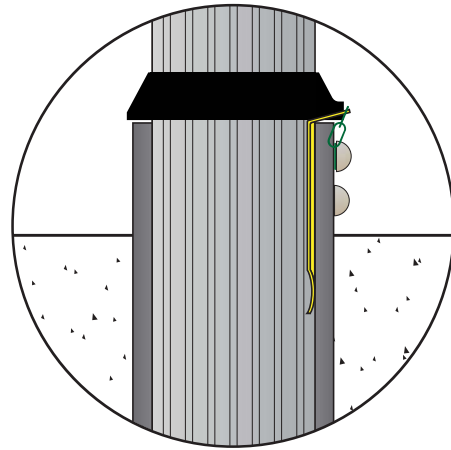

It is strongly recommended that foundation details are obtained from a local registered engineer prior to any installation.

**Drawing not to scale**  
**Issue Date:** 20/03/2019

The post cap must be fitted into the pole to reduce water ingress.

The ground sleeve seal must be fitted to prevent dirt and water from entering the ground sleeve.

Stainless steel transition shoe **MUST** be fitted and placed between the pole and locking bolts with the locking evenly tightened between 10-12 Nm
