

Cheat Sheet

Temporary Traffic Management Category 2 Roads Web Map

Widgets

Basemap Gallery

Apply different basemaps.

Add Data

- *Search* - If you have access to the Web Map Portal in your organisation, you will see all published feature layers in this section that you can add to this web application.
- *URL* - If you want to add a feature class from a different web mapping source, paste the service layer link in the URL box to add the feature class to this web application.
- *File* - If you have an Excel spreadsheet with XY, latitudes and longitudes, you can display the data from the spreadsheet to this map.

Print

If you want to change the printed map quality, click on 'Advanced' and change the 'DPI' value under the 'Print quality' section.

Bookmark

Save your favourite bookmark onto the map. Please note that any bookmarks that you save will not be visible to any other user.
