

# Vehicle Examiners

## Introduction

The purpose of the Special Information Bulletin is to provide updated information relating to the Register of Approved Vehicles (RAV) public search website.

## Background

The Australian Government Department of Infrastructure, Transport, Regional Development, Communications and the Arts (DITRDCA) has recently launched a new RAV public search website.

The new site has a different look and includes additional features within search results including:

- Additional information for some vehicles.
- Ability to be directed to the vehicle's applicable Road Vehicle Descriptor by clicking on the "VTA" number hyperlink (displayed in blue). This removes the requirement to search for the VTA on the ROVER website.

DITRDCA have advised the original public search site is still available and will be kept live and up-to-date for the foreseeable future. However, if using the original site, the newer features and additional information contained in new RAV search results will not be available.

## Actions:

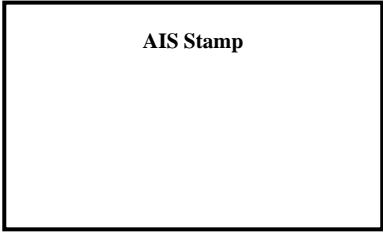

When searching for a vehicle on the RAV, ensure you are using the new RAV website as this will ensure you are viewing all relevant vehicle data.

The new RAV website can be accessed by clicking the link below, or by copying the link into your web browser.
